

Overview

An actively managed concentrated U.S. Small Cap equity strategy that seeks to outperform the Russell 2000 Index benchmark over a full market cycle with less risk. Objective is to provide long-term growth while protecting capital in down markets through disciplined risk management. Historically, delivers favorable downside capture with upside capture participation.

Investment Approach

Research intensive: employs a fundamental, bottom-up research process enhanced with integrated credit analysis and application of top-down themes. ESG criteria are also considered in the research process.

High quality: invests in businesses led by shareholder-aligned management teams with sustainable growth, self-funding capabilities and cleaner balance sheets.

Valuation discipline: measures upside/downside potential of each investment and invests when presented with a favorable upside/downside ratio.

Portfolio Construction

- 25 to 45 holdings
- 6% maximum position size
- Market cap within range of the benchmark
- Typically less than 30% portfolio turnover
- Typically less than 5% in cash

Investment Team

Christine Song, CFA – Portfolio Manager

24 years industry experience

Important Disclosures:

PAST PERFORMANCE IS NOT AN INDICATOR OF FUTURE RESULTS. An investor should carefully consider the Strategy's investment objective, risks, charges and expenses before investing. One cannot invest directly in an index. There is no guarantee that the investment objective of the strategy will be achieved. Index returns reflect the reinvestment of income dividends and capital gains, if any, but do not reflect fees, brokerage commissions or other expenses of investing. Period data over one year is annualized. You should not rely on this document as the basis upon which to make an investment decision. The Strategy's return may not match the return of the underlying index. Investing involves risk, including possible total loss of principal.

The principal risks of investing in this strategy include: Equity securities risk, Sector Risk, Non-diversification Risk, Effects of Compounding and Market Volatility Risk, Market Risk, Counterparty Risk, and Rebalancing Risk, which can increase volatility. The Strategy may invest in derivatives, which are often more volatile than other investments and may magnify the Strategy's gains or losses.

The performance returns contained the deduction of advisory fees, which will reduce the return. The deduction of advisory fees and the compounding effect thereof over time will reduce the total return on any account. For example, an account of \$10 million with a 1% fee that experienced a 10% compounding annualized total return over a period of five years would result in an ending dollar value of \$16,105,100 without the deduction of advisory fees. If an annual advisory fee of 1% were deducted from the account for the same five-year period, the annualized return would be 9%, with an ending dollar value of \$15,315,789. Additional information regarding policies for calculation and reporting returns is available upon request. Additional fees may apply, including brokerage and custodian fees, settlement fees, interest charges, wire fees, transfer fees and fund expenses, incurred in connection with the management of a client's account.

A FEE SCHEDULE IS AN INTEGRAL PART OF A COMPLETE PRESENTATION AND IS DESCRIBED IN PART II OF THE FIRM'S ADV, WHICH IS AVAILABLE UPON REQUEST. RETURNS INCLUDE THE REINVESTMENT OF DIVIDENDS AND OTHER EARNINGS, WHERE APPLICABLE.

Certain performance calculations are prepared internally and have not been audited or verified by a third party. The use of a different methodology for preparing, calculating or presenting performance returns and portfolio characteristic data may lead to different results and such differences may be material. "Representative Account(s)" discussed were selected based on a number of factors including, length of time in the composite and investment guideline applicability.

HOLDINGS AND SECTOR WEIGHTINGS – Sector and Holdings are subject to change and are not buy/sell recommendations. An investor should consider their objectives, financial situation or needs and risk profile before making any investment decision.

The information contained in this document may not be reproduced or provided to others without the prior written permission of New Century Advisors, LLC. The information provided is neither an offering nor a solicitation of an offering for any securities.

Prior to June 2023 the US Small Cap Strategy was known as the US SMID Cap Strategy and the prior benchmark was the Russell 2500. The benchmark was changed to reflect the portfolio characteristics.
